

Build your

FUTURE

Get a step ahead

**Dumfries
and Galloway
College**

Green Energy

Take your first step.

Build your future and turn your passion for a better, greener tomorrow into a sustainable career in green energy.

Get one step ahead and make a difference to the future of green energy in the region to help tackle climate change and make your dreams of a cleaner future a reality, giving you the confidence to thrive and grow in this rapidly growing sector.

We offer several courses and hands-on experience in specialist areas such as wind turbines, solar system installation and biomass.

Start your journey today.

++ *Our MISSION is to support the individual, social and economic development of the people, communities and businesses of Dumfries and Galloway by providing inclusive, accessible and relevant vocational and other learning opportunities in a positive and supportive environment.*

Joanna Campbell - Principal & CEO

Gain the skills you need to take you where you want to go.

Whether you want to:

build your future

change your career

learn something new

We will provide you with the **tools to excel** with a **real skill-based route** into the **workplace** or a **positive destination** onto **further education**.

Ways you can study with DGC ↓

College Academy

Start your journey from school and you can shorten your education journey and potentially start full-time employment sooner in your chosen career pathway.

Study options to suit everyone

From full-time, part-time or over just a few days, choose your course and way to study.

Study locally

Helping you save on associated study costs such as travel, accommodation and more.

Earn qualifications

At every stage of study, building your path to success.

Access routes

To university and further your options with support at every step.

College services and support ↓

As a student you have a number of services and facilities available to support and help you throughout your course at our campuses*

Library resources

Student support

Learning zones

Coffee and snack areas

Shop and refectory

Gym

Training workshops

Training Restaurant

Green Energy Centre & STEM Hub

Digital Care Hub

* Please note: gym, refectory, shop, green energy centre and digital care hub are exclusive to Dumfries campus.

Stranraer Campus

Dumfries Campus

From **student advisors** to **funding teams**, our aim is to provide you with a quality service so that you will have a **range of skills, support and the knowledge** required to successfully complete your course.

For further info on all our student services, check out our portal

Scotland has an ambitious target of being a net-zero nation by 2045 so there has never been a better time to look at how developing skills in sustainability can change the future, a career in green energy could be for you.

Green energy will help provide our region with reliable power supplies such as solar, wind, hydro, geothermal and biomass helping to diversify fuel sources and conserve our nation's precious natural resources.

Reducing our reliance on fossil fuels is crucial along with creating a reduction in our carbon footprint, helping us on the pathway to sustainability success.

Did you know ↓

With the advancement of 'green culture' and reduction targets, companies and global organisations are looking for skilled individuals that will help them meet sustainability aims and ambitions within a workforce that cares about a brighter future for all.

Study with us to enjoy:

Access to world-class facilities

Green energy hub offers real time experience in working with green energy systems, hosting a wind turbine, ground source heat pump, solar panel system and Tesla Energy storage, it's equipped to deliver the very best in green energy training.

Real experiences of work

Our courses are designed to provide you with the skills and hands on experiences you need by giving you the chance to put your skills into practice through real time projects and work placements.

Support from highly trained staff

Our lecturing and support staff will help you learn the academic theory and practical skills needed whilst helping you to develop your core skills, giving you all you need to get ahead and succeed.

A route to a viable career

With specialist training that gives you access to the skills of tomorrow you could become an electrical engineer, solar energy advisor or energy analyst.

Where green energy could take you ↓

Career Options

As more than 1 in 3 college leavers go on to find employment*, a qualification could lead to the following careers:

Energy Specialist – Renewable Energy

Are responsible for defining and implementing energy strategies for companies and organisations. Skills include identifying the needs of the organisation such as alternative fuel projects to help with de-carbonisation of energy consumption and carrying out the project from conception to completion considering deadlines, procurement and budget.

Electric/Hybrid Vehicle Technician

Can diagnose and repair faults, mechanical and electrical on electrical / hybrid vehicles within the automotive sector, whilst maintaining a high level of knowledge and attention to detail. Skills include using web-based systems, full understanding of automotive systems and functionalities, team working and a desire to advance skills

Wind Turbine Technicians

are resourceful and highly skilled individuals who are experienced with commercial and industrial electrical mechanics allowing them to maintain, inspect and repair wind turbines on site. Skills include actioning maintenance schedules, producing reports, inspection and testing of electrical, hydraulic and mechanical components and systems. They must also be able to work at height.

*based on SFC College Leaver Destinations report 19-20

The above is just a small section of the many careers available in the industry. Salaries can vary greatly, ranging from £24,000 to £35,000+ depending on what's required in the role and the employers job spec.

Onward Study

As more than 1 in 3 college students who graduate with an HNC or above go on to university study*, a qualification could lead you to some of the following possible degree options:

- Degree in Renewable Energy Engineering
- Degree in Renewable Energy
- Degree in Electronics and Renewable Energy Systems

*based on SFC College Leaver Destinations report 19-20

If you are thinking about progressing to onward study, check with your chosen university for requirements before applying with UCAS. Each place will have specific entry criteria and availability.
