Mini Prospectus | Career Guide

DGC Dumfries
and Galloway
College

Engineering

Take your first step.

Pave the way by solving problems and build your future by studying Engineering.

Get one step ahead and follow your passion towards an exciting industry with our engineering courses. With the latest technology, state-of-the-art equipment and our workshops will allow you to immerse yourself in the engineering environment.

Start your journey today.

Our MISSION is to support the individual, social and economic development of the people, communities and businesses of Dumfries and Galloway by providing inclusive, accessible and relevant vocational and other learning opportunities in a positive and supportive environment.

Joanna Campbell – Principal & CEO

Gain the skills you
need to take you
where you want
to go.

Whether you
want to:

build your future

change your career

learn something new

We will provide you with the **tools to excel** with a **real skill-based route** into the **workplace or a positive destination** onto **further education**.

Ways you can study with DGC ↓

College Academy

Start your journey from school and you can shorten your education journey and potentially start full-time employment sooner in your chosen career pathway.

Study options to suit everyone

From full-time, part-time or over just a few days, choose your course and way to study.

Study locally

Helping you save on associated study costs such as travel, accommodation and more.

Earn qualifications

At every stage of study, building your path to success.

Access routes

To university and further your options with support at every step.

College services and support ↓

As a student you have a number of services and facilities available to support and help you throughout your course at our campuses*

Library resources

Student support

Learning zones

Coffee and snack areas

Shop and refectory

Gym

Training workshops

Training Restaurant

Green Energy Centre & STEM Hub

Digital Care Hub

* Please note: gym, refectory, shop, green energy centre and digital care hub are exclusive to Dumfries campus.

Stranraer Campus

Dumfries Campus

From student advisors to **funding teams**, our aim is to provide you with a quality service so that you will have a **range of skills, support and the knowledge** required to successfully complete your course.

For further info on all our student services, check out our portal

Whether you're looking into being self-employed, working for a local company or working for a big corporation, engineering could be the career for you.

The engineering industry turns ideas into reality using science and maths to create buildings and machines. A rewarding career path, each profession can be vastly different from manufacturing engineering creating equipment to civil engineering designing railways.

Affecting every aspect of our daily lives, studying engineering can help you understand how our towns and appliances work.

From learning how to prototype designs in space engineering to working in solving agricultural problems this profession can take you anywhere.

Did you know ↓

With a varied job market studying Engineering you can become highly employable in many different sectors including construction, energy and software.

Study with us to enjoy:

Access to world-class facilities

Our workshops give you the opportunity to get gain knowledge in a safe and welcoming environment.

Support from highly-trained staff

Our lecturing and professional engineering staff will help you learn the academic theory and the practical skills you need to get ahead and succeed.

Job security

The world depends on engineering to create and maintain structures and machines. This essential service is needed throughout our society with many companies relying on it to improve their products.

A route to a viable career

With a qualification in engineering, you could go self-employed, work for a big corporation or work for a local company and beyond.

Real-world skills

Our courses are designed to provide you with the skills to be able to put them into practice, gaining real-world practical experience.

Where engineering could take you ↓

Career Options

As more than 1 in 3 college leavers go on to find employment*, a qualification could lead to the following careers:

Civil Engineering Technicians

Gives support to engineers in specialised areas on construction sites. This could be logistics, design or planning. Civil Engineering Technicians will have the knowledge and certainty to spot any problems that may occur on site and write reports for engineers.

Energy Engineers

are involved in the production of harnessing energy. They often work with sustainable sources such as hydro, solar power, wind and biofuel. Energy Engineers can work with companies who remove oil and gas making them more economical, sustainable and help them meet carbon reduction targets. Energy Engineers will be confident people who can research and find locations of energy sites.

Structural Engineers

are creative people who create and design buildings and structures which help solve problems. They can specialise in creating any venue or construction such as pipelines, schools, arenas and bridges. Structural Engineers will investigate the environmental conditions and how the project will be used to make sure it can endure any issues that may occur.

*based on SFC College Leaver Destinations report 19-20

The above is just a small section of the many careers available in the industry. Salaries can vary greatly, ranging from £17,000 to £30,000+ depending on what's required in the role and employers job spec.

Onward Study

As more than 1 in 3 college students who graduate with an HNC or above go on to university study*, a qualification could lead you to some of the following possible degree options:

- Degree in Civil Engineering
- Degree in Design Engineering
- Degree in Aerospace Engineering

*based on SFC College Leaver Destinations report 19-20

If you are thinking about progressing to onward study, check with your chosen university for requirements before applying with UCAS. Each place will have specific entry criteria and availability.
